

CFHI SCHOLARSHIPS

2025-2026

GAPS + OPPORTUNITIES

As part of its commitment to embrace diversity and inclusiveness, and foster equity in global health education experiences, CFHI provides scholarships to students from around the world who would not otherwise have access to global health opportunities. **Since 2000, over \$1.1 million of scholarship funding has been awarded.**

Despite the positive impact this support has had on the lives of many health professionals, **CFHI has capacity to meet less than 15% of requests.** It is more important than ever to grow our support. Low-income students in the US are disproportionately impacted by Federal cuts to loan and grant programs, while students from low-income countries are affected by the cuts to USAID initiatives. CFHI has an opportunity to fill in these gaps and contribute to a more inclusive field of global health professionals for a healthier world.
